- E. An update of the implementation schedule and timeline-** The timeline should include significant solid waste system benchmarks for a ten-year period. At a minimum, the schedule should include annual reviews and five-year updates of the plan (note review due dates will be reset with the approval of this update). It is useful to include disposal capacity issues, contract renewals and projected program enhancements or closures in the schedule. Assign any necessary action steps and indicate the party responsible for completion.
